Mike Petersen Announces Candidacy for Utah House District 3

North Logan, UT – Today local businessman, Mike Petersen, announced his candidacy for Utah Legislative House District 3. Petersen is running as a proud Republican as he challenges incumbent Representative Val Potter.

Mike Petersen plans to secure the Republican nomination through the caucus-convention system, and he looks forward to meeting the voters of House District 3 to share his vision with them. “While I have immense respect for Representative Potter, I’m hearing from many residents of District 3 that Representative Potter’s voting record is increasingly out of touch with the values that are a foundation of strength for the communities of Cache valley. I made up my mind to run for this seat while collecting signatures for the tax referendum. While collecting signatures, I had extensive conversations with the voters of House District 3, and I am confident they are ready for a representative who will commit to support low taxes, limited government, and strong families and communities,” Petersen said. While the 2019 tax reform bill was repealed and will no longer go before the voters in November, Mike Petersen is part of a growing movement of Utahns who recognize that our legislature and state government are out of touch with everyday Utahns. He sees his candidacy as a way for voters to hold the legislature accountable this November.

Mike Petersen and his family have lived in Cache Valley for the last 30 years. Mike is co-owner of LetterPress Software, an instructional design company located in the Innovation Campus at Utah State University. Mike and his wife Sallie have four children and eight grandchildren. Three of their children and their families live in Cache Valley.
